# Alexer®

## Protective Backing

- High MVTR
- Pleated film — better stretch, more comfort
- Waterproof and bacteria barrier

## Foam absorbent layer containing Ag

- prevent wound maceration
- provide a moist wound enviroment
- reduce the risk of infection
- rapid sustained release ionic silver with sustained effect up to 7 days

**Sustained silver release** ensures effectiveness against key pathogens

**High MVTR rate** supports good moisture balance

Super absorbent core supports **fast absorption** and helps minimize maceration risk.

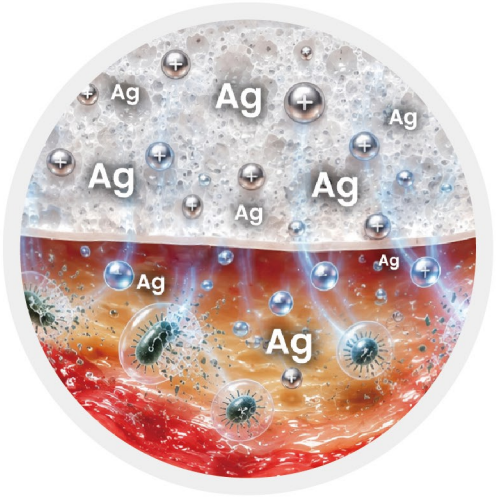

# Ag SILICONE FOAM DRESSING

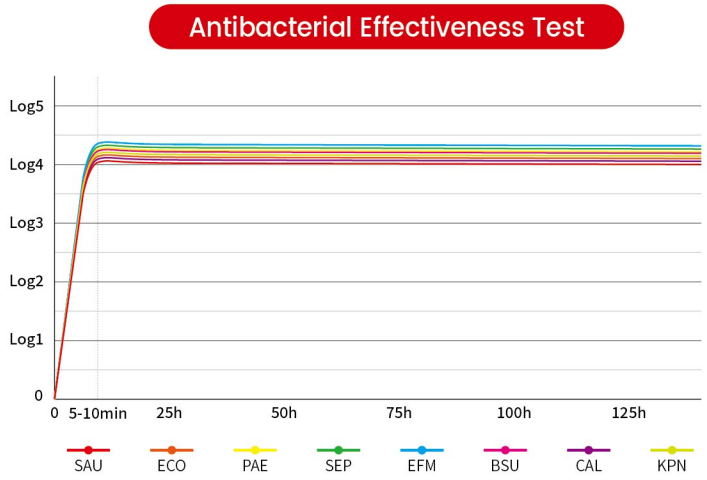

◇ Non-Adhesive

SLK MEDICAL

# DESCRIPTION

**Alexer® Ag foam dressing non-adhesive** is indicated for the management of exuding wounds such as leg and foot ulcers, pressure injuries, traumatic and surgical wounds, superficial and partial thickness burns.

# BENEFITS

- Waterproof and bacterial barrier-can shower with the dressing on the skin.
- High absorbency - Prevents excess fluid causing maceration to healthy skin and can reduce the number of dressing changes.
- Perforated wound contact layer with a gentle silicone adhesive perforated film – protects the wound bed from adhering to the dressing.
- Supports non traumatic removal – assists with minimising trauma at dressing change.
- Effective antimicrobial- kills and inhibits the growth of bacteria and prevents colonisation and proliferation of bacteria.
- Manages wound exudate and microbial contamination - which reduces wound pain during wound healing.
