Alexer® | ADVANCED GAUZE DRESSING

Alexer® Petrolatum Gauze Dressing

DESCRIPTION

Alexer® petrolatum gauze dressing is a fine-mesh, non-adherent primary dressing impregnated with petrolatum. It maintains a moist wound healing environment while clinging and conforming smoothly to all body contours.

APPLICATION

- Surgical incision
- Superficial skin lesions
- Routine wound drainage
- Dry skin cracks
- Fresh abrasion

Non-adherent

Provide a moist wound environment

Alexer® Manuka Honey Gauze Dressing

DESCRIPTION

Alexer® manuka honey gauze dressing is infused with medical-grade Manuka honey. This pure cotton gauze facilitates free drainage of wound exudate into absorbent secondary dressings. Its additive-free, natural formulation minimizes adverse reaction risks, making it ideal for targeted wound care.

APPLICATION

- Chronic skin ulcers
- Non-healing wounds
- Superficial burns and scalds
- Post-surgical delicate wounds

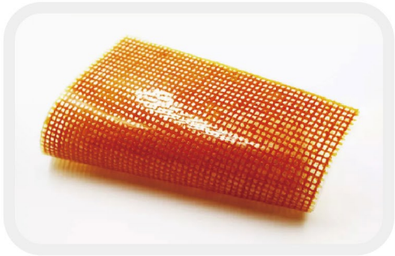

Natural ingredients

Promote healing

Alexer® Povidone-iodine Gauze Dressing

DESCRIPTION

Alexer® povidone-iodine gauze dressing, containing 10% povidone-iodine (1.0% available iodine), provides broad-spectrum antimicrobial protection against bacteria, fungi, viruses, and MRSA. Its non-adherent design minimizes trauma during dressing changes, easing pain while supporting healing. A unique orange-to-white color indicator signals iodine depletion for timely replacement—optimizing cost efficiency and maintaining a moist wound environment.

APPLICATION

- Infected traumatic wounds
- Disinfection before and after surgery
- Burns and scalds
- Superficial skin ulcers

Broad-spectrum disinfection

Prevents wound infection

Alexer® Xeroform Petrolatum Dressing

DESCRIPTION

Alexer® xeroform petrolatum dressing is formulated with a 3% bismuth tribromophenate solution, which exhibits bacteriostatic activity.

APPLICATION

- Superficial burns and scalds
- Granulation wound surfaces
- Superficial ulcers
- Traumatic wound surfaces with minimal exudate

Antibacterial

Reduce wound odor
