Alexer®

Polyurethane film backing

- Waterproof, bacteria barrier
- Prevent external friction
- Managing the micro environment

SAF absorption&retention layer

- Enhance absorption capacity
- Improve the water-locking performance

Non-woven distribution layer

- transfer the exudates to the super absorbent layer

Foam absorbent layer

- prevent wound maceration
- provide a moist wound enviroment
- reduce the risk of infection

S Cut: flex technology

- Extra conformable
- Stretchable and flexible

Silicone contact layer

- friendly to sensitive and fragile skin
- prevent adhesion to the skin and avoid secondary damage
- reduce the pain of dressing changes

SILICONE FOAM DRESSING

◇ Border Flex

SLK MEDICAL

INDICATIONS

Alexer® silicone foam dressing border flex is useful for moderately to heavily exuding wounds, such as:

- post -operative wounds
- sacral bedsore wounds
- pressure ulcers
- diabetic foot ulcers
- venousleg ulcers
- neuropathic ulcers
- arterial ulcers
- I - II degree burns

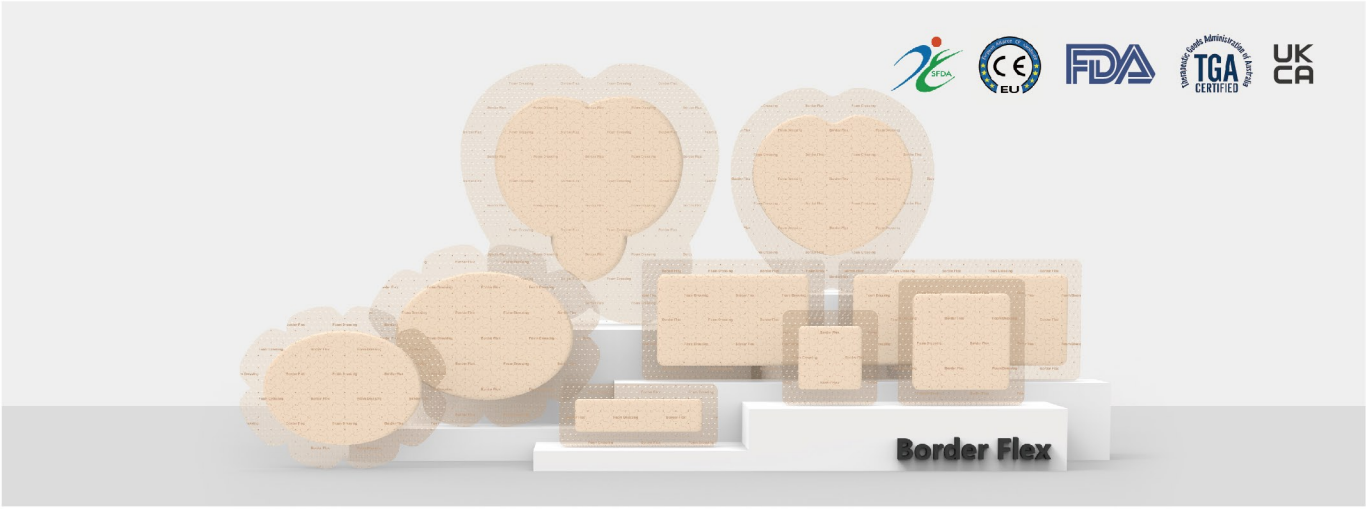

FLEX TECHNOLOGY

Five layer construction with Flex Technology in the absorbent layer.

Enables 360° stretch, for improved stay-on-ability and conform-ability.

Silicone gel brings less painful when dress changing and reduces risk of maceration.
