Alexer®

Foam absorbent layer

- Waterproof, bacteria barrier
- Prevent external friction
- Managing the micro environment

Silicone contact layer

- friendly to sensitive and fragile skin
- prevent adhesion to the skin and avoid secondary damage
- reduce the pain of dressing changes

SILICONE FOAM
DRESSING TRANSFER

SLK MEDICAL

INDICATIONS

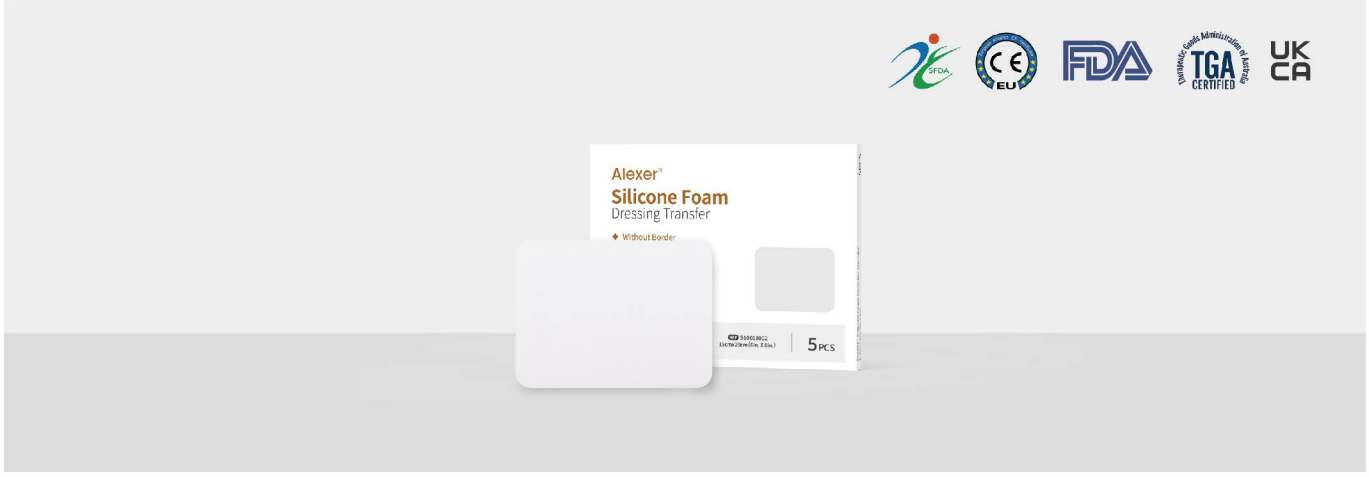

Alexer® silicone foam dressing transfer is designed for the management of a wide range of non-to-low exuding wounds, such as:

- epidermolysis bullosa wounds
- sacral bedsore wounds
- pressure ulcers
- diabetic foot ulcers
- venousleg ulcers
- neuropathic ulcers
- arterial ulcers
- I - II degree burns

DESCRIPTION

Alexer® silicone foam dressing transfer is designed for a wide range of exuding wounds, and difficult-to-dress wounds. It can also be used as a protective layer on non-exuding wounds and/or large areas of fragile skin.
