SLK MEDICAL

DESCRIPTION

A silicone creamy gel formula creates a barrier to help prevent new scars from forming, while improving the appearance of existing scars. Ideal for superficial and post-procedure scars, as well as cuts, scrapes, and burns.

- Superficial scars are left visibly smoother and softer.
- Provides a protective film over the skin.
- Helps reduce the appearance of scarring.

DIRECTIONS FOR USE

• Should only be used on healed wounds, never on broken or unhealed skin.
• The area must be clean and free of any creams. Skin must be washed every day.
• When first using silicone gel please build up a tolerance by gradually increasing the time worn.

Day 1	Day 2	Day 3	Day 4
2 hours	4 hours	8 hours	overnight
