# Alexer®

## 01. STANDARD

### Highly breathable bacteria-blocking film

— waterproof & bacteria barrier
— breathable but liquid-proof
— reduces external friction and manages the micro-environment

### Non-woven absorbent pad

— quickly absorbs exudate
— prevents maceration and infection

### Release paper frame

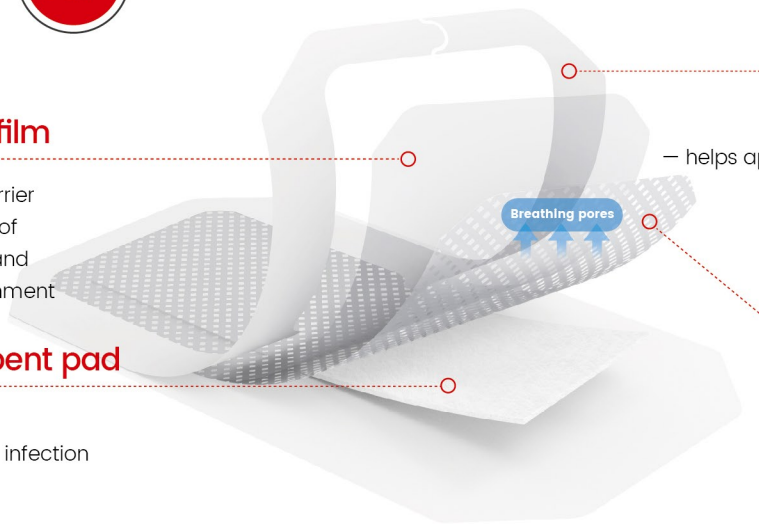

— notched design for easy tear
— easy removal
— helps application and prevents edge lift.

### Acrylic pressure-sensitive adhesive

— Full-layer coating ensures firmer bonding

## 02. HP VERSION

HP

### Highly breathable bacteria-blocking film

— waterproof & bacteria barrier
— breathable but liquid-proof
— reduces external friction and manages the micro-environment

### Non-woven absorbent pad

— quickly absorbs exudate
— prevents maceration and infection

### Release paper frame

— notched design for easy tear
— easy removal
— helps application and prevents edge lift.

### Island-chain grid adhesive

— island-chain grid coating more breathable

**High-Permeability Coating Technology**

# TRANSPARENT DRESSING

◇ with Pad

SLK MEDICAL

# DESCRIPTION

**Alexer® transparent dressing with pad -standard version** is a sterile, waterproof film bandage, designed with a non-adherent pad specifically for skin protection.

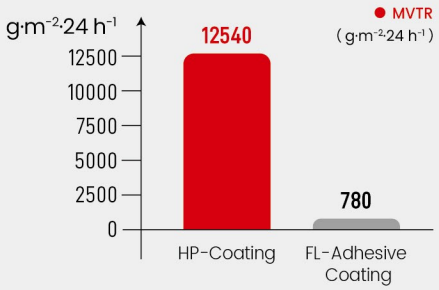

**Alexer® transparent dressing with pad -HP version** New-Generation HP High-Permeability Coating Technology, Upgrades traditional full-layer adhesive coating to an island-chain grid coating process:

- Superior Breathability
- Reduced Skin Complications
- Enhanced Patient Comfort

HP

### High-Breathability Coating Technology

Dot-Matrix Grid Coating VS Full-surface coating, the coating area reduced23%/$cm^2$ and the Breathability increased by 14.45 times
